

XRPayNet

The World's most diverse payment network.

XRPayNet is a cryptocurrency built on the XRP Ledger, with transaction speeds to transfer any amount of from one wallet to another, within 1-5 seconds and costs are fractions of a penny.

We at aim to change the payments world forever by focusing on changing online and in-store payments, 'In the Field' business payments market (such as plumbers, electricians), and the world of peer-to-peer transactions. We are going after everyday the transactions and micro-payments market.

- Our Mission -

The main goal of XRPayNet is to provide a payment interface suitable for stores, businesses selling any products or services, and anything to do with paying or sending money from anyone to anyone across the world. Consumer to Business, Business to Business, or peer to peer, our system will be a globally adopted interface and ecosystem for settlements of any kind.

- Our Vision -

We see XRPayNet as the coin and interface of the payments world when it comes to micropayments, settlement for goods and services, peer-to-peer transactions, and everyday spending. We will offer a world-class infrastructure with transactions processed on the XRP Ledger ensuring extremely low-cost transactions, ultra-fast. We believe that we will capture and conquer the current need for a real-life and on-demand crypto payment system that is becoming more and more requested and needed by people all over the world. We see our platform as the answer and fulfilment of these requirements.

- Our Core Values -

At **XRPayNet** we strongly believe in offering a product and service that is one of the very best available in not just the cryptocurrency marketplace but also in the marketplace of payments and settlements. We will do our very best to provide a product and service that is far superior to Bitcoin, Ethereum, and any coin built on any other Blockchain.

Our fundamental beliefs for our project are: Transactions must be **Fast, Cheap, Efficient, and Secure**, always done using the XRP Ledger. Our technology and software must offer a variety of payment options and credit options, with more flexibility if our native token **XRPayNet** is used.
